

TrimaZyme

The Rejuvenating System

Another in Dr. Hugh Smith's Client Education Series

Why TrimaZyme Was Developed

The best doctor you will ever have is the one you walk with everyday...your own body.

The rise in chronic disease (auto-immune disorders specifically) in the U.S. can be traced to several serious environmental problems not the least of which is human parasitic infestation, stealth pathogens in vaccinations and the increase in aluminum and heavy metal absorption in the body. While epidemiological studies linking auto-immune disorders, parasites, stealth pathogens and toxic metals with such conditions as chronic fatigue syndrome and fibromyalgia are rare, if not non-existent, we have found that stress, trauma and the associated vitamin deficiencies caused by an increase in the aforementioned situations play a serious role in the onset of these diseases.

[Buy TrimaZyme Now](#)

The inability of the body to absorb and process oxygen efficiently is partly due to a deficiency in malate and magnesium which appears to be directly linked to aluminum toxicity identified in the blood of patients with CFS/CFIDS, Alzheimer's, as well as other auto-immune conditions. We strongly suspect aluminum plays a more insidious role than previously believed as do such metals as lead, mercury and sodium fluoride.

Malic acid is a superior chelate and is an extraordinary detoxifier of aluminum and heavy metals and is effective because it significantly increases the fecal and urinary secretion of aluminum from the body and reduces the concentrations of aluminum from the internal organs.

The inhibition of the Krebs cycle (the *magnesium dependent* human energy cycle) is a major player in fibromyalgia and other chronic illnesses. Magnesium deficiency reduces the body's ability to block the toxic effects of aluminum which is increased by the ingestion of fluoride (in toothpaste, Teflon™ coated cookware and drinking water).

A manganese deficiency is also indicated in these conditions (especially MS) and manganese is important in neuroendocrine changes along the hypothalamic-pituitary-thyroid axis which regulates the metabolic rate by releasing thyroxin.

TrimaZyme

TrimaZyme is an enzymatically driven formulation *developed by Dr. Hugh Smith and exclusive to Sera Vita, LLC.* to help alleviate the complications and symptoms of auto-immune disorders such as fibromyalgia, chronic fatigue syndrome, multiple sclerosis, rheumatoid arthritis and many other conditions involving immune dysfunction.

Some of the disorders in which **TrimaZyme** has proved helpful are... Bacterial infections, Bell's palsy, Bladder infections, Thrombosis, Breast cancer support, Hematomas and bruises, Bursitis, Cancer, Cardiovascular, Carpal tunnel, IBS, Cirrhosis, Colorectal cancer, Fibromyalgia, Hepatitis, Herniated disc, Mononucleosis, Muscle cramps, Multiple Sclerosis and Rheumatoid Arthritis.

The near epidemic rise in some of these disorders over the past few decades is, in our experience, more properly labeled lifestyle illnesses. In other words, it is our belief that one does not *catch* these diseases (except in cases of mycoplasmas), but they are brought about by several environmental factors; diet, stress, trauma, chemicals, radiation, parasites and (highly probable) stealth pathogens in vaccinations. We *strongly advise* that sufferers consider dietary and lifestyle changes and such regimens *as Dr. Swank's MS Diet* book which is highly regarded by **Dr. Smith** for anyone suffering from these and other disorders.

Current medical thought is that auto-immunity is a condition where the body's immune system attacks itself. This is absolutely erroneous. These so-called autoimmune disorders are, in reality, autointoxication disorders. The human body was never designed, never can and never will attack itself. What actually occurs is that the body attempts to adjust itself to the new environment created by diet, chemicals, stress or radiation. This has been proven time and again by researchers since the brilliant researcher Bechamp discovered what he called mycozymas at the turn of the 20th century. It was further confirmed by Enderlein, (calling them protits) Rife, Naessans (calling them somatids) and others. Today, they are labeled protits.

It is imperative that you heed the "wake up" call your body is sending. It is time to learn to de-stress, get plenty of rest, change your diet and lifestyle and get a good amount of exercise.

TrimaZyme is not intended to be a "magic bullet" and is recommended in a *total protocol specifically designed for individual requirements.*

Mycoplasmas & Stealth Pathogens

Over the past few decades, intermittent research has been ongoing regarding stealth pathogens in vaccinations. One of these is the highly pleomorphic micro organism, mycoplasmas. There are about 70 species (and hundreds of sub sets) of these dangerous organisms which exist somewhere between virus and bacteria making “western” treatments ineffective and somewhat suspect.

“Standard” treatments which include antibiotics are questionable given the fact that mycoplasmas may be a result of medical “treatments” to begin with and is a bit like returning to the mechanic who originally caused the damage to your car. Mycoplasmas can cause GI tract infections, upper respiratory problems, nerve damage and a host of other problems not normally considered by established practitioners.

According to University of Texas researchers *Joel B. Baseman and Joseph G. Tully* “Recently, mycoplasmas have been linked as a cofactor to AIDS pathogenesis and to malignant transformation, chromosomal aberrations, the Gulf War Syndrome, and other unexplained and complex illnesses, including chronic fatigue syndrome, Crohn's disease, and various arthritides. Even with mounting evidence of their pervasive and pathogenic potential, mycoplasmas still evoke the image of a group of obscure or impotent microorganisms. Yet they are evolutionarily advanced procaryotes, and their elite status as "next generation" bacterial pathogens necessitates new paradigms in fully understanding their disease potential.”

We consistently observe mycoplasma damaged red blood cells in the blood in a consistently growing percentage of patients. Our process is simple and direct; eliminate the mycoplasma and reverse the damage done. While this may seem simplistic keep this caveat in mind; we generally assume as a rule of thumb that reversal of disease requires one month for every year of suffering.

Ridding the body of mycoplasmas requires a ***total commitment*** on the part of the patient since they are highly defiant “critters.”

Can Fibromyalgia, Arthritis, CFS, MS And Other Auto-Immune Disorders Be Cured?

It is our experience and conclusion that current thought regarding “incurable auto-immune disorders” is erroneous. We are told they are incurable by the medical establishment simply because they insist upon a pharmacological view of cure rather than a more causal approach of dietary change and vitamin and mineral supplementation.

The fact is, modern bacteriology and pharmacology are based upon selective data and less than faulty science. Modern medicine is grounded in Pasteur's bacterial morphology which even Pasteur denied prior to his death.

In our years of observing the blood of our hundreds of clients, we are constantly amazed at the recuperative abilities of the human body. We have had many individuals with severe disorders (who strictly follow the recommendations) see their conditions reversed and their lives changed.

The Formulation

The ingredients are nothing new, but have been uniquely combined to take advantage of their individual and synergistic effect and each ingredient has been used independently by **Dr. Smith** and other researchers and European clinics (notably, Germany) to reduce and repair pain, fatigue and the damage done by the stress of these lifestyle diseases.

If one were to purchase these ingredients individually, the cost would be exorbitant to say the least. **TrimaZyme** is packaged in 300 capsule bottles with the "average" dosage being 5 capsules 3X a day. The purpose of this packaging is to allow an individual to adjust portions depending upon severity of symptoms. Additionally, **TrimaZyme** should be considered as *part of a complete program* and should be individualized according to condition and necessity. More on applications later.

Calcium/magnesium/boron are necessary for proper muscle function and many immune disorders (e.g. CFS/CFIDS) exhibit symptoms of muscle pain, spasms, fatigue, etc. Calcium will not absorb properly without magnesium and is essential for the activity of certain enzymes, such as glycogen phosphorylase kinase which is involved in energy production. It plays an important role in muscle and nerve cell regeneration. For calcium to be properly assimilated, the body must have sufficient enzymes, magnesium and boron. So one may be taking large amounts of calcium supplements (to "prevent" osteoporosis) but without enzyme activity, absorption is incomplete at best. Additionally, the body will not absorb calcium within two hours of ingesting animal protein. We highly advocate that individuals limit their animal protein intake (especially red meats) to 45 grams per day.

Manganese appears to be a serious deficiency in auto immune disorders and in particular, MS. Manganese is also a part and activator of several enzymes including arginase, ribonucleotide reductase pyruvate carboxylase, superoxide dismutase, and enolase. It is absolutely vital for normal neural function, protein and carbohydrate breakdown and is especially necessary for fatty acid, cholesterol and hemoglobin synthesis. It assists in urea synthesis, prevents lipid peroxidation and activates enzymes necessary for vitamin C, biotin, thiamin and choline use. We strongly recommend that, as an adjunct to TrimaZyme supplementation, that a mineral product supplying manganese be considered.

Lecithin is required by the body to properly process fats and 15 capsules of **TrimaZyme** contain 3600 mgs. of lecithin. This is of particular value given the propensity of Western civilization to ingest huge amounts of saturated fats. We strongly urge that you immediately reduce your intake of saturated fats and begin supplementing your diet with Essential Fatty Acids, fish oils and extra virgin olive oil.

Malic acid is essential in energy production and is especially helpful with the fatigue associated with the stress induced by chronic pain and fatigue. Perhaps more important, as explained earlier, malic acid is a superior supplement that enhances detoxification of aluminum from the body. When combined with magnesium, malic acid enhances ATP, the amino acid that enhances energy in the body.

Pancreatin is an enzyme to help support the pancreas as it works to detoxify the body during the initial phases of nutritional intervention. Pancreatin breaks down proteins and is useful as a digestive aid, pancreatic insufficiency, increases absorption of fats and is helpful in the treatment of cystic fibrosis.

Trimethylglycine (TMG) (also called betaine), is a substance manufactured by the body. It helps break down another naturally occurring substance called homocysteine. In certain rare genetic conditions, the body cannot dispose of homocysteine, resulting in its accumulation to extremely high levels. This, in turn, leads to accelerated cardiovascular disease and other problems. Oral TMG is an FDA-approved treatment for this condition. It "methylates" homocysteine, removing it from circulation.

Bromelain is another important enzyme effective in breaking down proteins, aids absorption of nutrients, fights inflammation, inhibits fibrin synthesis, and is helpful with such conditions as cellulitis, diabetic ulcers and numerous inflammatory conditions. Clinically, bromelain has been shown to enhance probiotic use.

Papain is a supplementary enzyme used by the body to break down proteins and is useful in the treatment of diarrhea and celiac disease. It is extremely helpful for intestinal discomfort due to parasites such as nematodes. It is especially helpful in fighting allergies, infections and inflammation.

Trypsin is an important enzyme that helps the body reduce inflammation, reduces circulation problems such as thromboembolic diseases, peripheral vascular disease, peripheral arteriosclerosis and ischemia. It speeds healing and reduces post operative swelling.

Chymotrypsin is another enzyme that helps reduce inflammation and is especially important in relieving arthritis, soft tissue injuries, contusions, edema and is helpful in treating enterozoic worms. It is often used as a cancer treatment.

Together, these ingredients combine for an intensive antioxidant effect. They affect the immune-system in a positive manner and have a protective effect against tumors.

This formulation is specifically designed to alleviate symptoms and help the body repair itself and **Dr. Smith** is the exclusive inventor and formulary for **TrimaZyme**.¹

Testimonials

Following are but a few of the testimonials we hear everyday in our clinic.

Dr. Smith,

Thank you so much for all the work you put into **TrimaZyme**. I have endured the EBV for the past 11 years as the result of nearly losing my life to mercury poisoning. I was told, by doctors, there was nothing that could be done for me. I NEVER accepted their beliefs. I have relentlessly researched and tried just about every supplement, diet change, and life style adaptation to some avail but have not received complete healing yet. I have been using O'Leave, red marine algae and chlorella and started feeling better but was still suffering from INEFFABLE fatigue. But then I found your product. OH MY GOSH, I just started taking it yesterday and I AM NOT TIRED AT ALL! My head is clear too. When one is completely exhausted the mind is so overwhelmed with the exhaustion you cannot think about much else. I knew about Malic acid, Manganese and the Calcium/Magnesium connection and even supplemented my diet with them but just didn't receive the results that I am now. I thank you for using the knowledge God has gifted you with to heal the unhealthy, and I thank and praise God for gifting you.

Respectfully,

K.P. Temecula, Ca

As a client of Hugh Smith for the past ten months, I am yelling from the roof tops to anyone who will listen. Make an appointment as soon as you can.

The vitaligo, chronic fatigue, and fibromyalgia that I have had for 20 yrs to the point of being in a wheel chair [pain in my body was so bad I did not want to move, never the less walk] and taking methadone and vicodin three times a day are gone.

I no longer take any of these medications and gave away the wheel chair.

I use the **TrimaZyme, magnetic pad for water**, and other vitamins he recommends.

Hugh Smith has altered my entire life. Actually given me back a life. I follow his advice to the letter and have regular check ups.

The silly thing is, it is so simple. Go back to the front page and read his article on our "Blood."

You won't be sorry you did.

Thanks again Hugh for your commitment to good health and a great life!!!!!!

Julie Thoma Lincoln, Ca. Yes, you may use my name and city.

¹ These statements have not been evaluated by the Food and Drug Administration. TrimeZyme is not designed to treat, mitigate, prevent or cure a disease.

I am a proud 45-year-old mother of two daughters and grandmother of one. All of my life I have battled a sluggish bowel. I wasn't bothered by it enough to take action until 1974. I was hospitalized for two weeks. After two weeks of tests, the physician sent me to a specialist for an additional two weeks of tests in a different hospital. The first physician diagnosed me with IBS and the second physician basically said I need to learn to handle stress better. From 1974 to 1997, I dealt with my problem alone (mostly feeling very un-comfortable). I visited several health food stores and followed the advice they gave me - resulting in a budget crisis (more stress). During these years I developed "Epstein Barr" - a member of the chronic fatigue syndrome group. I couldn't give up. After all, this is the body that I live with every second of the day. I took a chance on the internet and got into a group that conversed about IBS. After many conversations with Dr. Smith via the internet, I started on a new program that involved just three products: digestive enzymes, **TrimaZyme** and Colostrum. *Results were experienced the following day.* It has only been 10 days since I started the program, but it's terrific to be on the road to feeling 'normal' after all of these years. To describe it in one word - FINALLY!
I was very lucky to accidentally encounter Dr. Smith.

A Happy Pegg Charlotte, NC

I am an 80-year old woman who has been suffering with arthritis for over 30 years. For many, many months I have not been able to sleep at night because of a severe pain in my right leg. I also have had extreme pain in my thumbs. At times I was unable to hold a pen to write. I dropped things because I couldn't grip with my thumbs.

I have sought help from physicians but they were unable to relieve any of the pain. I was taking a prescription drug called Percocet™ and I was also taking Tylenol™ Arthritis. Neither of these helped me.

After I started taking **TrimaZyme** (15 per day) and OPC's (3 per day) I got relief. My leg pain lessened within a few days and, on the third day it disappeared and has not come back. After about nine days the pain in my thumbs was also gone. **The relief has been amazing!**

Thank you so much for helping me have a better quality of life.

Sincerely,

Jane Donnelly, Los Angeles, CA.

I had hip replacement surgery over 15 years ago and lived in constant pain everyday. Within minutes of taking **TrimaZyme** the pain was totally gone and hasn't returned in over 4 weeks. I can't believe the results or live without **TrimaZyme**.

Lou Swartz, Detroit MI.

I'm an over the road truck driver. For years, the arthritis in my hands was so bad I couldn't fully close my hands. After a week on Dr. Smith's protocol that included **TrimaZyme**, I have complete mobility in my hands.

S. Alley, Sacramento, CA

I am a professional racquet ball player (2nd seed in the nation) and need energy and mobility. My wrists had given me some severe problems for several months and my doctor had prescribed pharmaceuticals. Unfortunately, the side effects were worse than the "cure."
After a few days on **TrimaZyme**, my pain is gone and my energy level is higher.
Thanks, Dr. Smith

C. Gardner, Sacramento, CA.

I have had MS for several years. My primary care physicians at the Atkin's Center in Manhattan recommended I try **TrimaZyme** from Dr. Smith. Along with their OPC's, the **TrimaZyme** seems to have alleviated many of my symptoms and has made a huge difference in my energy levels.

Judith Ilch, New Jersey

I have suffered from Chronic Fatigue Syndrome for a number of years. I began Dr. Smith's protocol (which included TrimaZyme) and in a few days the level of energy increase and reduction in pain has been nothing short of amazing.

J. R., Fair Oaks, CA.

Protocols and Recommendations

First, since mycoplasmas “feed” on the amino acid L-arginine, we recommend that clients avoid *all* foods containing arginine which includes chocolates and sugars. Avoid *any* supplements containing L-arginine.

Second, take 1 teaspoon of **Sovereign Silver**² (10 ppm) on an empty stomach 3X-6X daily. 45-60 minutes later take 2-3 capsules of probiotics to replace the friendly flora killed by the silver). Do this for 7 days, rest for one week and repeat at least 3 times. Mycoplasma infection may require 3-6 months for complete recovery. Continue on probiotics for at least 30 days following silver. Colloidal silver, in our experience, is the most effective way to kill mycoplasmas without the side effects of antibiotics.

We also recommend that an O'Leave be used in cases of extreme chronic conditions. Consult your health care professional for advice. Most often, we recommend 1 capsule every 2 waking hours for at least 90 days.

During the administration of **Sovereign Silver**, we also recommend ¼ cup of aloe vera juice in the morning and evening to help seal the colon. This is necessary since most auto immune disorder patients are highly likely to have leaky gut syndrome, as well. The aloe functionally “band aids” the porous colon and allows the colon time to heal.

For severe pain, we recommend 10 capsules of **TrimaZyme** be taken immediately followed by 2 capsules every hour until the symptoms are alleviated. Then, take 5 capsules 3X a day. Once symptoms appear to be lessening, the individual may begin tapering the dosages to 2-3 capsules 3X a day.

² In some cases, we recommend Barlean's Olive Leaf Complex in lieu of colloidal silver. See your alternative care provider for more details.

Aptinol is recommended for it's ability to scavenge free radicals, reduce inflammation, strengthen red blood cells, restore collagen and detoxify the body. Usual dosages are 3 mg per pound of body weight, but we recommend at least 3 165 mg capsules per day as an initial starting point for 2 weeks. Should symptoms remain, individuals should increase the dosage until they feel better. Then they may reduce to a maintenance dosage.

Colostrum should be included in the total protocol for its ability to repair damaged tissue and nerves while helping repair such concomitant conditions as leaky gut syndrome and damaged myelin sheaths. Dosages for severe symptoms should be at least 2 capsules 2X a day for 30 days and reduced to 1 capsule 2X a day from then on.

For the majority of immune diseases, we recommend 5-10 capsules of **TrimaZyme** 3X a day until symptoms and severity are reduced.

<p>Recommendations for the use of TrimaZyme. These recommendations should be supplemented with additional protocols from your practitioner and are not to be considered Medical Advice. These protocols should be adjusted according to the weight of the individual & severity of symptoms and additional symptomatic considerations. Please note that some supplement language may appear foreign.</p> <p>Aptinol indicate Dr. Smith's Proprietary Blend Squalamine is present in shark liver oil. Alpha Factor indicates New Zealand Colostrum. "3DailyPlus" indicates digestive enzymes and multi-vitamins.</p>

Company Profile

Dr. Hugh Smith is an internationally recognized researcher in mycoplasma and cell wall deficient form research. He has written numerous articles in journals and health magazines regarding parasites, mycoplasmas and cell wall deficient forms.

His observations using Vital Hematology utilizing phase contrast microscopy have isolated many conditions for which there was little that mainstream medicine could diagnose or reverse.

He has been a consultant to numerous M.D.'s from around the globe and has performed blood analyses for such notable physicians as Dr. Robert Atkins, Dr. Patrick Fratellone and many doctors refer patients to Dr. Smith.

Thousands of clients have had success using Dr. Smith's observations and protocols for help with chronic diseases such as MS, IBS, Parkinsons, Cancer and a host of conditions which seemed hopeless.

If you or someone you know is seeking answers to health questions, feel free to call Dr. Smith at 760-613-8645.
